# TOOL VISION SYSTEM

Take advantage of the revolutionary benefits of the automated capture and toolalignment for correct positioning of tools before machining

**NEW**

## Main applications

- For automated capture of blanks/tools
- with soldered PCD plates on the front
  - with sintered PCD veins
  - with cooling channels
  - and many more

## Technical details

- Camera system permanently installed in the robot cell
- Two lenses available:
  - for tool diameter from 1.7 mm to 12 mm
  - for tool diameter from 6 mm to 32 mm

## Your advantages

- Significant time savings of the automated process compared to the manual measurement method
- Valuable working hours of employees can be used for other tasks
- Eliminates human errors
- Teaching of new tool geometries is easy and possible by trained machine operates themselves
- No damage to the tool due to non-contact method
- For tools in the diameter range from 1.7 mm to 32 mm
- Camera system works during off-time
